

STRATEGOS *Technical Workshop*

Innovative Technology at work for Transportations and Cyber Security

9.30-13.00, February 26th, 2020, Thales, Via Lucchese, 33, 50019 Osmannoro, Firenze
POC: Ing.Massimo Romairone, Thales Group, massimo.romairone@thalesgroup.com

This Experience allows to visit and observe real Innovative Solutions addressing Mass Transportation as well as Cyber Security within a Major Multinational Group developing these aspects in Florence.

Joint Cooperation

THALES

Workshop Description:

The necessity to protect **Complex Systems, Installations** such as **Airports** or **Transportation Systems** such as street cars and urban rails solutions provides major challenges today. In this sector it is crucial to consider both **Safety & Security** and to operate on a **Common Cyberphysical Layer**.

This Workshop includes presentations and **Guided Tour** to the **Thales Lab** where in Florence where it is present a **Major Competence Center** on these aspects for the Group, in particular the Workshop will address:

- **Innovative Tramway Signaling Solutions**
- **Airport Operations Control Centre (AOCC) Applications & Supervision Systems**
- **Cybersecurity applied to different Sectors**

Free Access for Industries, Professionals and STRATEGOS Classes
